DETAILED ACTION

Allowable Subject Matter

Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance: As argued by applicant, Hibi and Robbins fail to disclose a phantom body made of a composition which is self-sealing when cooled. While self-sealing materials are known in medical training devices, as shown for example by Chase and Bloom, there is no suggestion of a phantom body which has the recited properties. Applicant's invention is novel in that it works simultaneously as a phantom for imaging and a model for practicing puncture techniques having self-sealing properties. While phantom devices are known, and models for practicing puncture techniques having self-sealing properties are also known, there is no motivation or suggestion to combine these teachings to form the claimed device without using impermissible hindsight. It is particularly noted that Chase discloses a model whose coating 10 has self-sealing properties, while the entire phantom body of the claimed invention has this feature. As a result, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 3711

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chase, Bloom and Bartolo disclose medical training devices comprising materials having self-sealing properties.
